

MIKEY'S

MOBILE DETAILING

425-600-7897

Print at Actual size (100%), not Fit to page. This bar should measure exactly 10 inches. If it doesn't, the letters are off too.

1. Tape this sheet on top of white permanent outdoor vinyl (Oracal 651), on a cutting mat or cardboard.
2. With a brand new hobby knife blade, cut along every letter edge, the holes inside letters too: through the paper and the vinyl, not the backing under it. Change the blade when it starts to drag.
3. Lift off the paper. Peel away all the vinyl that isn't a letter, and pick the holes out of A, B, D, O, 6, 8, 9 and 0. The letters stay on the backing.
4. Lay transfer tape over the letters, rub it down hard, then put it on the glass.
