Treat Street board: where every page goes

Royal Brites Stage-It, 44 × 37 in open. Each box is one page, labelled the same as the page.

How to put it up

1. Print every page at **100% / Actual size** (not "Fit to page"). 42 pages.
2. Trim each page on its four corner marks.
3. Lay each piece out on the floor first: H = header, L = left wing, C = centre, R = right wing, S = shelf edge. "C2-3" means centre panel, row 2, column 3, counting from the top left.
4. Glue the pages onto the board edge to edge (glue stick or spray adhesive), starting at the top left of each panel. Every piece is printed a little bigger than the board on purpose: once it's dry, trim it to the board's own edge with a box cutter, around the header's arch too.
5. The shelf edge strip goes on the front lip of the shelf.
6. Scan the QR with your phone. If it won't open the quote page, glue the last page (the QR patch) right over it.
